DESCRIPTION, PERFORMANCE, &c.

LATH is a fine bay, without white, 15 hands 3 inches high, with good bone and capital action. At 3 years old, he won the produce stake at Columbia, 2 mile heats, beating Mr. Taylor's fifty, Daisy, and Captain Spana's colt, Convention, nine others paying forfeit.—Two weeks afterwards, he won the Jockey-Club purse, 3 mile heats, at Augusta, beating Kite, and distancing Black Bird. At Charleston, he was besten by Clod-Hopper for the Jockey-Club purse, 3 mile heats; being very much amiss, he was drawn after the first heat.—At 4 years old, he won the Jockey-Club purse, 4 mile heats, at Camden, beating Sir Kenneth and Dorabells, at 3 heats, losing the first in consequence of bothing when several lengths in advance of the field, just before he reached the judge's stand, and getting entangled

when several lengths in advance or the through the reached the judge's stand, and getting entangled amongst the carriages, he sustained an injury which occasioned his withdrawal from the Turf.

LATH was a race horse of the first class, which he evinced in his trials with Bay Maria, tharlotte Russe, and Kitty Heth, and in point of blood, he is inferior to none, whether imported or native. His constitution is robust, having never been sick, and his temper good.—His colour, form, and action, speak for themselves. In a word, Lath unites in himself as many claims to public patronage, as any young Stallion that I know.

W. HAMPTON.

Willwood, Jan. 22, 1839.

Willwood, Jan. 22, 1839.

From the above certificate of Col. Hampton, who bred and had LATH trained for the Turf, it will be seen that he considered him a Race horse of the first class, not only from the races he has mentioned as heving run publicly, but from private trials he has made with horses which are now on the Turf, and running with considerable success. It will also be observed by his Certificate, that he considered Lath of the porrest blood;—not to be surpassed by any horse imported or native. I consider it entirely unnecessary to attempt to enlogise Lath, either for his performances on the Turf or as to his blood, since in every respect he is so well attested. But will remark, that Lath has not only descended from pure blood, but has come from stock, both sire, grandsire, dum, and grandam, that are of the running blood. For instance, his sire Godelphin, made his four miles in 7 minutes and 50 seconds; his grandsire, the American Echpee, so well known at the North and South, made his time in the great match race, the North Against the South, 220,000 saide, in 7 min, and 37 sec; which he won with considerable eclat, and which gained him the memorable name of the Champion of the North; his dam, was sired by the renow nod Sir Archy, whose reputation are racer, &c., slands unquestioned both in England and America. The grandam of Lath, Old Lottery, bred by the great Southern Amsteur of horses, Col. R. Singletón, of South Caroline, has produced more fine race horses than my other mare in the Union. Thus it will be seen that there is united in Lath two of the best study of the South, Hampton's and Sungleton's, crossed with Gen. Coles of the North.

The public is now presented with such an opportunity of improving the blood of that noble and eseful snimal, the horse, as very nacely occurs in this section of country.

"The Emperor Napoleon attached the gravest importance to the hat. It was a trait of his greatness to produce the most striking effects from the most simple causes. "I have it directly from a person attached at that time to the service of Napoleon, that when he placed at for the first time on his noble front, he tried with long and minute study, the various ways in which it could be worn. After several attempts, he set it en colonne, (lengthwise) but presently with an energetic movement, he shifted it en baltaille, (frontwise) and with a smile, made the pose immortal! It was a discovery of a noble simplicity, more severe than graceful, but admirably suited to the habitual character of his face. Ah! when this great man traversed his gardens with when this great man traversed his gardens with rapid steps after the councils of state, or the tedious sittings of his cabinet, the frowns were seen to vanish from his brow, and under his petit chapeau his eyes flashed like the fire in the diamond. When he mounted his horse, and rode into the melec, the petit chapeau, which he stuck upon his head with a peculiarly brusque unovement of his hand, was like a crown of victory. It was to the hero far more inspiring than the diamonds of Charles V., or the nag of Mansfield. This sublime chapeau is one of the great models. But who dare went it after Napoleon?

The snow-clad summits of her mountains look down upon the elemantal war of the storm-clouds floating above the shrubless prairie, that realize the absolute notion of the earth being an immemplain; and towards the ocean on the east and the west, upon the broad rich valleys where the father of the waters, the "endless river," and the majestic Columbia with its hundred branches gently wind along or rapidly rush on to mingle their waters with the waves of the Pacific, the Gulf of Mexico, or the magnificent expanse of our northwestern Caspian seas.

Could the power of vision at once extend over our whole wide domain, what a grand ennubling scene would be presented to a spectator standing upon one of the lofty peaks of the Rocky mountains, or as Washingtou Irving aptly denominates it, "the crest of the world." And then to take upon a summer day, a birds eye view of all our roads, canals, rail-roads, lakes, and rivers—the innumerable post-coaches whirling along over our standing magnetily along our waters, our scenares gliding imagnetily along our waters, our scenares gliding intercourse between the sea board and the miland maritime cities, our peaceful armament approaching and departing with the commerce of the world:

But, instead of the winged words and the impassioned eloquences with which he was to enchant the House and galleries, his sentences come out dull and lifeless. Members yawn and quit their seats, or betake themselves to writing letters or reading newspapers. The unfortunate debutant, as he proceeds, becomes more and more embarrased; his statistics become confused; he blunders; his mercann, intended to be sharp, yet court-cous, degenerates into personal abuse; he is called to order by the Speaker; and at last finishes a speech to which nobody takes the trouble to reply, and which the reporter slurs over in a single paragraph. "To return to my first question. A long and narrow face requires the crown rather low, and the brim not too marlow. A large face requires the crown rather low, and the brim not too ample.—Large some, broken noses, red, pimpled, and visnous noses, all require to be kept in shadow by a broad brim. A person of inferior statue cannot too tall diminish his appearance by a hat lower than usual.

I can't conceive of any life more wretched than that which is led by at least seven-tenths of the members of Congress. At home they are highly respectable people, estimable members of suciety for the most part, and by their constituents are considered capable of taking a prominent part in the business of the National Legislature. Every one of them perhaps has nourished some ambitious schemes, and when he writes his first frank, feels as if he was about to enjoy the full frustion of his hopes. On his way to the Capitol, he revolves in his mind the important subjects upon which he is about to act. He is filled with vague imaginings of the splendid successe which awaits him in his legislative career. A conspicuous station on the most important committees, the able report, the cogent argument, the witty repartee, the brilliant and effective speech, the congratuation of friends, the wide-spread fame, the abserved of all absolders, the Speaker-ship in prespect, and—who knows what happen?—a foreign mission, a Sceratary-ship, or even the Presidency itself—all these things are apt to float through the mind of a young or middle-aged man about to make his debut in the dignity of an M. MORGAN THE MURDERED.

Some ten or twelve years ago, the writer of this paragraph communicated to the Evening Post a story which he had picked up "somewhere in his travel," to the effect that Morgan, the revaler of Masonic secrets, isstead of being killed and bursid in the waters of Niagars, was actually living in Snyrma in Asia. He did not believe the story and caused it to be published more in a joke than in earniest, as an egperiment on the public credulity. It had an immense run, and was the occasion of no little sparring among believers and unbelievers in Morgan's assessmantion. The subject is recalled to the memory by accidently encountering, in a work recently published in London, the following paragraph. We quote from "The shores of the Moditerranean," by P. H. Standish, Esq. "I met at Smyrma with a renegada, who had renounced his Christian creed, and lives as a Turk, be is a native of the United States of America, by name of Morgan, and is charged with having revealed what has resisted the importunities even of the wife, and the cauming of the inquisitive all over the world, namely the secrets of Masonry.—His hie as thome was threatened; his creditions countrymen believed that he had disappeared in the Falis of Niagara, but he found safety in flight, and is regarded by the Asiatics as a regenerated babe."

Thus in the introduction to the preceeding extract, speaks one of us, not associated with this paper at the time indicated. Another of us, one who had no small part in the masonic and antimasonic wars, very well remembers the circumstance received to, and the many ingenious articles that were published, in order to induce a belief that the real Morgan had not been mardered, and buried in the deep caverns of Niagara. FRACAS.

On Wednesday afternoon, while Commodore Elliott was coming in the railroad cars to this type to attend the Court of Inquiry to be held at the Navy Yard, a person who is called Major Mcdonald, of Louisiana, spoke very disrespectfully of Generals Gaines and Jessup, and of the commanding officers of the Navy, and especially of Commodore Elliott, whom he represented as a coward in the battle of Lake Erie, and if tyrant in the Mediterranean. Commodore Elliott replied that he was mistaken in the facts, that a Court of Inquiry upon the battle of Lake Erie, in 1915, the record of which was now in the Navy Department. which was now in the Navy Department

record of which was now in the Navy Department, had settled the case very differently.

Major McDonald denied this, and continued his vituperations of Commodore Elliott. Not wishing to disturb the Ladies in the car, Commodore Elliott the car, a gentleman, in an under tone, to then requested a gentleman, in an under tone, to deliver his card to McDonald, with a request that he would not leave the city till he had heard from the Commodore. #### THE WESTERN CAROLINIAN

SALISBURY:

THURSDAY EVENING, MAY 2, 1839.

We are authorized to announce CHARLES FISH-ER, Esq., as a Caudidate to represent the 10th Congressional District in the next Congress of the United States.

To Correspondents .- We have received three communications in succession, probably from the same hand, requesting us to publish what members of Congress voted to raise their wages from six to eight dollars per day. We would certainly comply with the wish of our correspondent, if we had the information, but we have it not, nor do we just now know where to obtain it. If our correspondent dent will furnish us with it, we will publish it with oleasure.

The Editor of the Watchman, in his notice of A Whig," published in this paper two weeks ago, is not content to cast imputations on that writer, but indirectly throws his slurs at us, and at Mr. ne on that writer Fisher, who has been extensively solicited to offer for Congress, and who, it will be seen, is now a Candidate. It is not necessary for us to say any thing in defence of "A Whig," for he is fully able to defend himself; but we say for ourselves, that we do not intend any longer to observe silence under the imputations that certain individuals are in the habit of casting on us, and our paper. They ally repeating them.

When we first took possession of the Western Carolinian, we laid down our principles in a prospectus which was published to the world. We have never yet departed from these principles, nor do individuals that we could name, have acted with the most giaring them sued our course, turning neither to the right nor left to please any Party.

We have advocated peither Van Buren nor the Sub-Treasury: but, because we are not constantly calling the Democratic Party loco-focos, and charging Mr. Van Buren with base corruptions, we are put down as Van Buren men. Because we have not whipped around like some others, and extolled the Pet Bank System to the skies-a system which these very men once denounced more bitterly than they now do the Sub-Treasury, - because we have not done this, they call us Sub-Trensury men. Though we are no Van Buren men, and d not belong to his party, yet we intend to act a fair and honest part towards him. In our humble sphere we opposed his election with all our might, and we disapproved of the arts by which he was elected; but notwithstanding our opposition, a majority of the People of the United States chose to make him President, and he is now not the President of the Democratic Party alone, but of all the American People, and as such, we intend to treat him with becoming respect; nay, we intend to do more, to give an honest, and cordial support to all such measures of his administration as we approve, while on the other hand, we shall censure and conas we disapprove.

If this course of fair-dealing makes us Van Buren men, then be it so; -we shall pursue no other; nor have we any reason to believe that our Patrons are dissatisfied with our course. We have lost but few of our old Subscribers since we took possession of the paper, while we have gained several hundred new ones, and still continue to gain. We have received the approbation of as honest and upright weeer gone on horseback to Morristown 12
Whigs, as any in the country, afid what is still better, we have the approparion of our own consciences. ter, we have the approbation of our own consciences.

We hope our readers will excuse us for saving so much about ourselves as we have just done .-We have more cause for it than they are aware of. In the commencement of these remarks, we introduced the name of Mr. Fisher as being a fellowsufferer with ourselves in this secret warfare that has been waged against us. His principles have been as much misrepresented as our own; the same charges have been extensively circulated against him, and with the same degree of truth. He is now a Candidate, and if any are ignorant of his principles, without doubt, they will soon have an opportunity of knowing them.

It may e "an honest one," for we impute dishonesty to be "an honest one," for we impute dishonesty to no man; but it is, also, truly a "very wide and singular mistake:" How any one who has at all mingled with the people of this, and the two adjoining counties, can venture such an assertion, is "singular," indeed; and if what the Watchman says be so, we are more deceived than we ever before have been in the conrse of our lives. During the past five or six weeks, our ordinary business has occasioned us to mingle much with the people; we have in this time, visited every county in the District, save one, and we can with sincerity and truth, say that the wish for an opposition to Mr. Rencher, is wide and extensive; indeed, it is almost general; and we may with truth also say, that the call for Mr. Fisher to ofter, is equally general.

But it is useless for the Watchman and ourselves to dispute about this point, for the discission of it is now committed to the people, the only legitimate source to try and decide the question.

MERORS. Epirons: I invite the particular notice of Circular, which is as follows:

" Having enjoyed this public trust now for so ma naving enjoyed this public trust now for so ma-ny sears, I am unwilling to ask a continuance of it, lest it might be thought by some that I was seek-ing to monopolize more of the public favor than ought to fall to any one individual. There are also personal considerations which make private life desirable to me. My health has been greatly im-paired by the arduous duties and confinement of paired by the arduous duties and confinement of the like I Congress, and requires rest and recre-ation. If, therefore, my friends can agree upon some other gentleman, I shall be glad to retire from public life, and will cheerfully units in his support. In saying this, (and I say it in great sin-cerity.) I do not wish to be considered selfah, or disposed to consult only my own wishes. My friends have been very kind to me, and he feel wil-ling to make any personal sacrifices to serve them. If, therefore, no other gentleman can be agreed If, therefore, no other gentleman can be agreed upon, and they should think my experience in pub-lic life would aid in the vindication of correct principles, or the support of a good cause, I could not refuse to obey their wishes in standing a candidate or another term.

With high respect and esteem, I am your fel-w-citizen, A. RENCHER."

In this closing paragraph, Mr. Rencher tells us that e wishes to retire from Congress and take some "rest to retire from Congress and take some "rest ation," and that he will do so, on a certain Now what is this condition? It is this: hat his friends can agree on some other lis words are,—" if my friends" can agree I never before knew that the office of

I never before knew that the office of Member of Congress belonged exclusively to Mr. Rencher, and his particular friends. I thought it belonged to the people; and yet he as good as says, that he will not give it up unless his friends can first agree on the next man to fill it. But who are his friends and its dispute. ple; and yet he as good as says, that he will not give it up unless his friends can first agree on the next man to fill it. But who are his friends!—and if a dispute shall arise as to who are his friends!—and if a dispute shall arise as to who are his friends, then how is this to be decided! Why, he reserves his right to himself. In the first place, he in effect says, he will not decline unless his friends can agree, and, it the next place, he reserves to himself the right to say who are his friends. Let us see for a moment how this condition will work: suppose three-fourths of the people say to him,—Sir, we are willing to let you off; he will answer by saying —oh! but you are not my friends, and therefore, I am not willing to be off. The people then say, we hereto tore voted for you! He then answers, by saying, you may once have been my friends, but you are not my friends now, because you don't want me to offer. If you were my friends you would wish me to offer, and support me. According to this idea, ho persons are his friends unless they wish him to offer again, and he is determined to hold on until those whe wish him to offer, can select another gentleman.

acternance to note on unit nose was wish him to offer, can select another gentleman.

But let us take another view of his Circular, and the conditions imposed: He says, thathis health has been greatly impaired by his arduous daties, &c., and that private life is desirable to him.

If Mr. Rencher comes out after this declaration, it will prove one of two things: First,—either that he was not sincere in his declaration that he wants to rewas not sincere in his declaration that he wants to retire; or, secondly, that he think there is no other man in the District fit for the statich but himself; for certainly no prodent man would ris his health, and endanger his life in going to Congess against his own wishes, unless from a conviction that he himself is the only man in the District fit to di the work. Now, are the people of our District read to admit that Mr. R. is the only man in the District fit to di the work. Now, are the people of our District read to admit that Mr. R. is the only man in it, who is fight represent them? If we have no men of our own, we had better borrow one rather than force Mr. Renche to serve us against his wishes, and to the ruin of his fealth.

I do not make these remark in any unfriendly feelings towards Mr. Rencher; but he has now been in Congress ten years, and, unless weinlesd to give him a hife estate in the office, we may askell make a change. It is a notorious fact, that in the en years be him been in

AFRICA.

Saturet of a letter from Dr. Gotreen of the Methodist Mission in the Southern Churchman.

Since my residence in Africa, my eyes have been compolled to view things differently to what they did in America. Having been educated in a non-slaveholding State, I was daily taught to look upon the man who held slaves as a monster scarcely human, and at all times to regard those engaged in holding slaves as participating in crime of the deepest dye; and notwithstanding I have resided in one, and travelled in several slave States, and never beheld the shade of a shadow of an attempt at the cruelties said to be (daily) practised upon the slaves, yet it was impossible for me to overcome early prejudices, or to believe any thing else than that slavery, as there practised, was the greatest evil in the States or in the world, which I now very much doubt. That slavery as it exists in some parts of the universe, is an evil unparallelled by any other, is most true; but that it is burdened in the United States with all the cruelties and barbarities that the race is subject to, is found in the United States with all the cruelties and barbarities that the race is subject to, is burdened in the Ontered States with ail the crueities and barbarities that the race is subject to, is
very far from the fact. Shavery in the United
States, in its worst form, and under the lash, is
not as bad as elavery in Africa, in its mildest form.
It is a well known truth that in Western Africa
inne-tenths of the whole population are in a state
of slavery. The females are sold at an early age,
to be, when they grow up, vives or beasts, of burdee, as their proprietors may require. If the majority here were not slaves, how would they ever
get into the foreign slave dealer's hands; where
do the Portuguese and Americo-Spaniards get
their slaves? By plundering and ravishing the
country! No. By seizing and tearing them from
their habitations along the count! No. Nor by
housing them from place to place with dogs;
but they are obtained from the Kings of the country, who smad and bring them from the fir interior in droves, and sell them as cattle to the highest
bidder. They are sept in hundreds from the interior to the "slave factories," and sold for tobacco, powder guns, cloth, and whiskey. Our coast
is thickly settled by natives, who dwell secure
from molestation by the slavers; they are not
stolen and gathered promiscously by every and
any means; nor are they deprived of their liberry when they are forced to leave these shores,
they only change masters. Slaves they are, and
such they have been to the most savage rulers,
who inflict upon them the severest punishments,
and feel free to kill, to eat, or to throw them alive
upon the funeral pile, at pleasure. Slavery in the
States, though an evil, cannot possibly be as great
a one as it is hore. There thousands hear the word
of God, and are soundly converted to the Christian
fifth; here, hitherto they have had as such opporunities, and it appears evident that God is about
to overrule through the instrumentality of the Colonization Society, this, as he did Joseph's slavery
is Egypt, and thereby bring about a great and
having and returned to the facts re. Here is the country where slavery, with slegitimate and concentrant horrors, exists. Africa is the mother that clings to it as her only, her dearest offspring; here is the land for the "Friend of Man" to commence operations, and the believer in "equal rights" and the "Liberator" to begin their work of charity. And here is the country so deeply dyed in the sins and blood of slavery, as to require all the abolitionists and colonizationists, and their united means and labours for conturing in plantage in the sins and labours for conturing in plantage is the sins and labours for conturing in plantage is the sins and an accountry to the sins and their united means and labours for conturing in plantage is the sins and accountry to the sins and the s centuries, in clearing its skirts and removing the foul stains that make her the prize-money of other nations. The members of a certain society in the United States, who are much opposed to the Col-nization Society, and equally so to the giving of their means for benevolent purposes, and also to the dealing in human flesh and blood, and who are very anxious that the native African should be taught, if they were here, (of which there is no likelihood) would find their way to usefulness completely closed up; for, in order to be permitted to teach females, your missionaries are under the necessity of purchasing them when children, and paying for them as we nay for other animals. ing for them as we pay for other animals.

Mr. Cates had rented a building in Hernando, which Woodell, without right or title, had possession of. C. washed to take possession, very civilly requested W. to remove. The latter, replied with very abusive language, which the former retorted with warmth, when Woodell struck him a blow with the helve of an axe so violently as to prostrate him on his knees—in which attitude Cates drew a pistol and fired at his assailant, lodging a ball in the breast—upon which W. attempted to draw his knife, when C. drew and fired a second pistol, the ball of which also entered Woodell's breast.

Laughter.—Physiologists and physicians have demonstrated that laughter, in proper quantities, improves digestion, and regulates the functions of various viscera. In this way it promotes health, cheerfulness and vivacity; inspires benevolence and all the kind feelings of the heart. In itself a have just received a LARGE and FRESH supply pleasure, it adds to that of others by sympathy, and drives away the wrinkles of care, and the sul-len frown of habitual moroseness. Shakspeare who seemed to know all sciences by intuition Julius Casar, makes the great Captain distrustful of the lean Cassius, who never laughed.

The Wandering Piper .- This extraordinary The Wandering Piper.—This extraordinary man, who had so recently been employed at the Northumberland Tavern, was buried yesterday—having expired on Monday in one of the Dublin hospitals for distressed individuals. His name has been kept a secret from all, I believe, but his spiritual guide. His statement was, that many years ago be made a wager, binding himself to pursue that extraordinary career of life he had so long adopted. Had he relinquished that undertaking, he was wont to say, his family would lose the large wager in question, which, of course, is cancelled now—that is, if it ever were made—for the termination of his career would induce a belief, that the whole was the professional ruse of a cunning close man. ning close man.

Oh Life: I breathe thee in the breeze, I feel thee bounding in my veins, I see thee in these stretching trees, These flowers, this still rock's mossy strains.

This stream of odors flowing by.

Prom clover field and clumps of pine.

This music thrilling all the sky.

Prom all the merning birds, are thine

Then fill'st with joy this little one,
That leaps and shines beside me here,
Where Iser's clay white riv'lets ron
Through the dark woods like frighted deer.

Ah! must thy mighty Breath, that wakes losect and bird, and flower and tree, From the dark trodden dust, and makes Their daily gladness pass from me—

Pass, pulse by pulse, till o'er the ground These limbs now strong, shall creep with pain, And this fair world of sight and sound Seem fading into night again!

The things, oh Life! thou quickenest, all Strive upwards towards the broad bright sky. Upward and outward, and they fall Back to earth's bosom when they die.

All that have borne the touch of death, All that shall live, he mingled there, Beneath that veil of bloom and breath, That living zone 'twixt earth and air.

There lies my chamber dark and still; The atoms trampled by my feet There wait, to take the place I fill In the sweet air and sunshine sweet.

Well, I have had my turn, have been Raised from the darkness of the clod, And for a glorious moment seen The brightness of the skirts of God;

And knew, the light within my breast, Though wavering oftentimes and dim, The power, the will, that never rest And cannot die, were all from him. Deer child! I know that thou wilt grieve,

To see me taken from thy love, Wift seek my grave at Sabbath eve, And weep and scatter flowers above.

Thy little heart will soon be healed, And being shall be bliss, till thou To younger forms of life must yield The place thou fill'st with beauty now.

When we descend to dust again, Where shall the final dwelling be Of Thought and all its memories then My love for thee and thine for me.

#### VARIETY.

There is a man in Baltimore who is so fat that it takes him twenty-four hours to turn round. And a man in New Orleans so thin that he gets his board for nothing—his landlady not knowing that he boards with her. And another man in Mississippi who, is so tall that he does not pay poll tax—his head being considered out of the county. So says an exchange paper. We don't vouch for it—Microcosm.

Character of a Gentleman.—A lawyer, at a circuit town in Ireland, dropped a ten pound note under the table while playing at cards at an inn. He did not discover his loss until he was going to bed, but then returned immediately. Ou reaching the room, he was met by the watter, who said, "I the room, he was met by the water, who said, "I know what you want sir, you have lost something."
"Yes I have lost a ten pound note." "Weil sir, I have found it, and here it is. "Thanks, my good sir, here's a sovereign for you." "I want no reward for being honest;" but, looking at him with a knowing grin—"wasn't it lucky that none of the gentlemen found it."

A lit nations, from the remotest ages, have had ships, A but Columbus on y found out the way to America. Bet re the time of the great Spanish navigator, people were only enabled to padde about the shores. Just so with the Life Medicines. It is but two short years since I first ventured upon an unknown ocean, and I discovered the precious object I was in search othealth. Vegetable medicines were indeed known when I commenced my search, but their use was not. By the use of them, I have not only passed from the dejected invalid, to the hile, hearty and active man of business, but comparatively speaking, I have renewed my youth. I can thus, with confidence in my own experience, advise with my fellow-citizens. Does the reader want proof that the VEGIFTABLE LIFE MEDICINES are suitable to his own case? I have on file at my office, 367, Broadway, hundreds of letters, from some of the most respectable citizens of this my native land, voluntarily offered in testimony of the virtues of A GOOD VEGETABLE MEDICINE.

JOHN MOFFAT.

General remarks relative to Moffat's Life Pills and Phanix Bitters.

These medicines have long been known and appre-ciated, for their extraordinary and immediate powers of restoring perfect health, to persons suffering under nearly every kind of disease to which the human frame

is liable.
In many hundreds of certificated instances, they have is liable.

In many hundreds of certificated instances, they have even rescued sufferers from the very verge of an untimely grave, after all the deceptive nostrams of the day had outerly failed; and to many thousands they have permannily secured that uniform enjoyment of health, without which life itself is but a partial blessing. So great, indeed, has their efficacy invariably and infailibly proved, that it has appeared scarcely less than miraculous to those who were unacquainted with the beautifully philosophical principles upon which they are compounded, and upon which they consequently act. It was to their manifest and sensible action in purifying the springs and channels of life, and endowing them with renewed tone and vigor, that they were indebted for their name, which was bestowed upon them at the spontaneous request of several individuals whose heves they have obviously saved.

The proprietor rejoices in the opportunity afforded by the universal diffusion of the daily press, for placing his VEGETABLE. LIFE PILLS within the knowledge and reach of every individual in the community. Un-

by the universal diffusion of the daily press, for placing his VEGETABLE LIFE PILLS within the knowledge and reach of every individual in the community. Unlike the host of pernicious quackeries, which boast of vegetable ingredients, the Life Pills are purely and solely vegetable, and contain neither Mercury, Antimony, Arsenic, nor any other mineral, in any form whatever. They are entirely composed of extracts from rare and powerful plants, the virtues of which, though long known to several Indian tribes, and recently to some eminent pharmaceutical chemists, are altogether unknown to the ignorant pretenders to medical science; and were never before administered in so happily efficacious a combination.

Their first operation is to loosen from the coats of the stomach and bowels, the various impurious and crudities constantly settling around them; and to remove the hardened fixes which collect in the convolutions of the small intestines. Other medicines only partially cleanse these, and leave such collected masses behind, as to produce habitual contiveness, with all its train of evils, or sudden darrhas, with its imminent dangers.—This fact is well known to all regular anatomists, who examine the human bowels after death: and hence the prejudice of these well informed men against the quack medicines of the age. The second effect of the VEGE-TABLE LIFE PILLS is to cleanse the kidneys and the bladder, and by this means, the liver and the lungs, the healthful action of which entirely depends upon the regularity of the urmary organs. The blood, which takes its red color from the agency of the liver and the lungs before it passes into the heart, being thus purified by them, and nourished by food coming from a clean longs before it passes into the heart, being thus purified by them, and nourished by food coming from a clean stanach. coarses freely through the veins, renews eve-ry part of the system, and trumpliantly mounts the tea-ner of health in the blooming cheek.

The following are among the distressing variety of human diseases, to which the Vegetable Life Pilis are well known to be infallible:

THE PHŒNIX BITTERS, are so called, because they passess the power of restoring the expiring embers of health, to a glowing vigor throughout the constitution, as the Phœnix is said to be restored to life from the ashes of its own dissolution. The Phœnix Bitters are entirely vegetable, compaced of roots found only in certain parts of the western country, which will intalishly cure Fevers and Agues of all, kinds; will never fail to eradicate entirely all the effects of Mercury, infinitely sconer than the most powerful preparations of Sarsavarilla, and will immediately cure the determination of Blood to the Head; never fail in the sickness incident to young females: and will be found a certain remedy in all cases of nervous debility and weakness of the most impaired constitutions. As a remedy for Chronic and Infanmatory Rheumatism, the efficacy of the Phœnix Bitters will be demonstrated by the use of a single bottle. The usual dose of these bitters is half a wine glass full, in water or wine, and this quantity may be taken two or three times a day, about balf an hour before meals, or a less quantity may be taken at all times. To those who are afflicted with indigestion after meals, these Bittors will prove invaluable, as they very greatly increase the action of the principal viscera, help them to perform their functions, and enablethestomach to discharge into the bowels whatever is offensive. Thus indigestion is easily and speedily removed, appetite restored, and the mouths of the absorbort vessels being cleansed, nutrition is facilitated, and strength of body and energy of mind are the happy results.—

recommended.

N. B.—These P.ils and the Bitters will get all mercury out of the system infinitely faster than the best preparations of Sarsaparilla, and are a certain remedy for the rushing of blood to the head, or all violent head-aches, tie douleureux, &c.—All persons who are predisposed to apoplexy, palsy, &c., should never be without the Life P.ils or the Bitters, for one dose in time will save life. They equalize the circulation of the blood, draw all pressure from the head, restore perspiration, and throw off every impurity by the pores of the skin.

#### IMPORTANT NOTICE.

Persons using the Life Medicines, are advised to take the Pills at night, in sufficient quantities to operate two or three times on the bowels in the course of the next day. Also, take a table-spoonful of the Bittera half an hour before each meal. For those of a delicate or en-fecbled constitution, half the quantity may be sufficient.

French, German, and Spanish directions, can be obtained on application at the office, 367 Broadway.

The following is an extract from a forth

The following is an extract from a forthcoming work of Dr. Peters, the discoverer of the celebrated "Vegetable Anti-Bilous Pilis."

"HEALTH, wealth, and enjoyment, are the three prime objects of life. The two former are only sought as a means to obtain the latter. Man seeks for wealth as a means to obtain the latter. Man is such pursuit without the possession of health. Without bodily vigor and strength, neither the physical nor the mental—neither the inner nor the outward man is capable of any achievement, whether of wealth or of enjoyment.—

Mens sams in corpore seno—a sound mind in a sound body—is the sine qua son—the absolute requisite—for any efficient effort in the attainment of human ends.—The mind may be active, but if the body be feeble, then is the mind active to little purpose. Enjoyment is not here; and the finest laid plans are rendered abortive by the shattered condition of our tenement of clay.

But say that a man could obtain wealth—that he could acquire the gold of Ophir, and bring home all the treasures of the mines of Golconda, yet without health, where would be his happiness? He would be miserable in the minist of his gold and his diamonds; he would pine away in wretchedness and despair; and he would exclaim with the wise man of old, "All is vanity and exaction of spirit!" His limbs are racked with pain, and he cannot rest; his appetite is gone, and he loathes he food; his stomach is oppressed with nausea, and he turns sickening away at the bounties of a munificent Providence. He would give all he is worth—nay, all the world, if he had it-for the poor, but healthy man's appetite. "Please givere," and a hungry wretch, to a wealthy, feeble man—"Please give me suxpence to buy me a morsel of food; I am almost starved!"

"I would give a thousand dollars for your appetite," said the rich man, as be handed the hungry one a dollar. Of so much importance is health to the enjoyment of life!

But whereto, methinks I hear the reader ask, subserves this homily on so plain and hacknied a subject! Do we no

Of so much importance is health to the enjoyment of life!

But whereto, methinks I hear the reader ask, subserves this homily on so plain and hacknied a subject! Do we not all attend to it as one of the chief, if not the chiefest concerns of our mortal existence! Do we not employ the means to attain and preserve it! Do we not lay out money—do we not fee physicians—do we not follow their advice—do we not swallow their prescriptions!

True—most true gentle reader, thou dost all things, we dare say, and more. Still, we cannot believe our homily on health to be altogether unnecessary. As in morals, so in physic is it requisite to have "line upon line, and precept apon precept." Men in health forget that they may be set; and men in sickness do not all ways employ the most judicious means to attain health. Yery true, Doctor—men do not as you may, always pursue the right road to health. N.w., I know of some people who are always dowing themselves with physic, and running to the doctors and apothecaries every day of their lives. They take, I verily believe, a cart load of drugs in a year, and yet they are not well after all. Do you know the reason?

Why, yes, in my opinion, there are two reasons. In the first place, they take too much medicine, and in the second, they do not take the right kind. I used to make the same mustake. But lately—that is to say for two or three years past—I've hit upon a better plan. I take Dr. Petera's Vegetablo Bilious Pills, and I derive more benefit from one dollar laid out in them, than I used in maying fifty in any former pursuit of health, bendes saving a world of nausea and dayuat in swallowing an enromous quantity of medicines. Do you know Dr. Peters! Very well.

"And have you ever taken his medicine?"

"I have; I were a blockhead else."

"They ten me has a some you have the tensisty as I am with the road to mill."

"You are right informed. Dr. Peters is no empiric. He does not understake what he does not understand.—He was regularly bred to the healing art. He has spent years in the

voted himself to the study of the human frame, and the diseases to which it is subject, and now he is applying his acquisitions to the relief of suffering humanity. He does not put forth the absurd claim so often advanced by the inventors of patent nostrums—namely, that of curing all diseases with a single prescription! Such a pretence he would deem about as difficult to swallow, as to take the nostrums of those who put it forth. There is no such medicine. There is not, and never was, a panacea for all diseases. The viborralize minimitely better, they effect whatever they undertake. They keep the word of promise to the stomach, and the prima via which they make to the ear and eye.

And that indeed is no slight recommendation. Nor are the complaints to which these Phils are adapted few nor far between. The disorders arising from a merbid
